

Large Conference Room Profile

See that room profile below? That's just one of several ways you can configure Stem in your large conference rooms. Below you can see a Stem Ceiling, Table, and Wall accompanied by a Stem Hub and Control. Each device connected directly to the network via a single Ethernet cable. Stem's ecosystem approach gives you the freedom to mix and match devices to create your own customized setup. If three Stem Ceilings or three Stem Tables are more your style, go right ahead. This is your room. Design it to fit your needs.

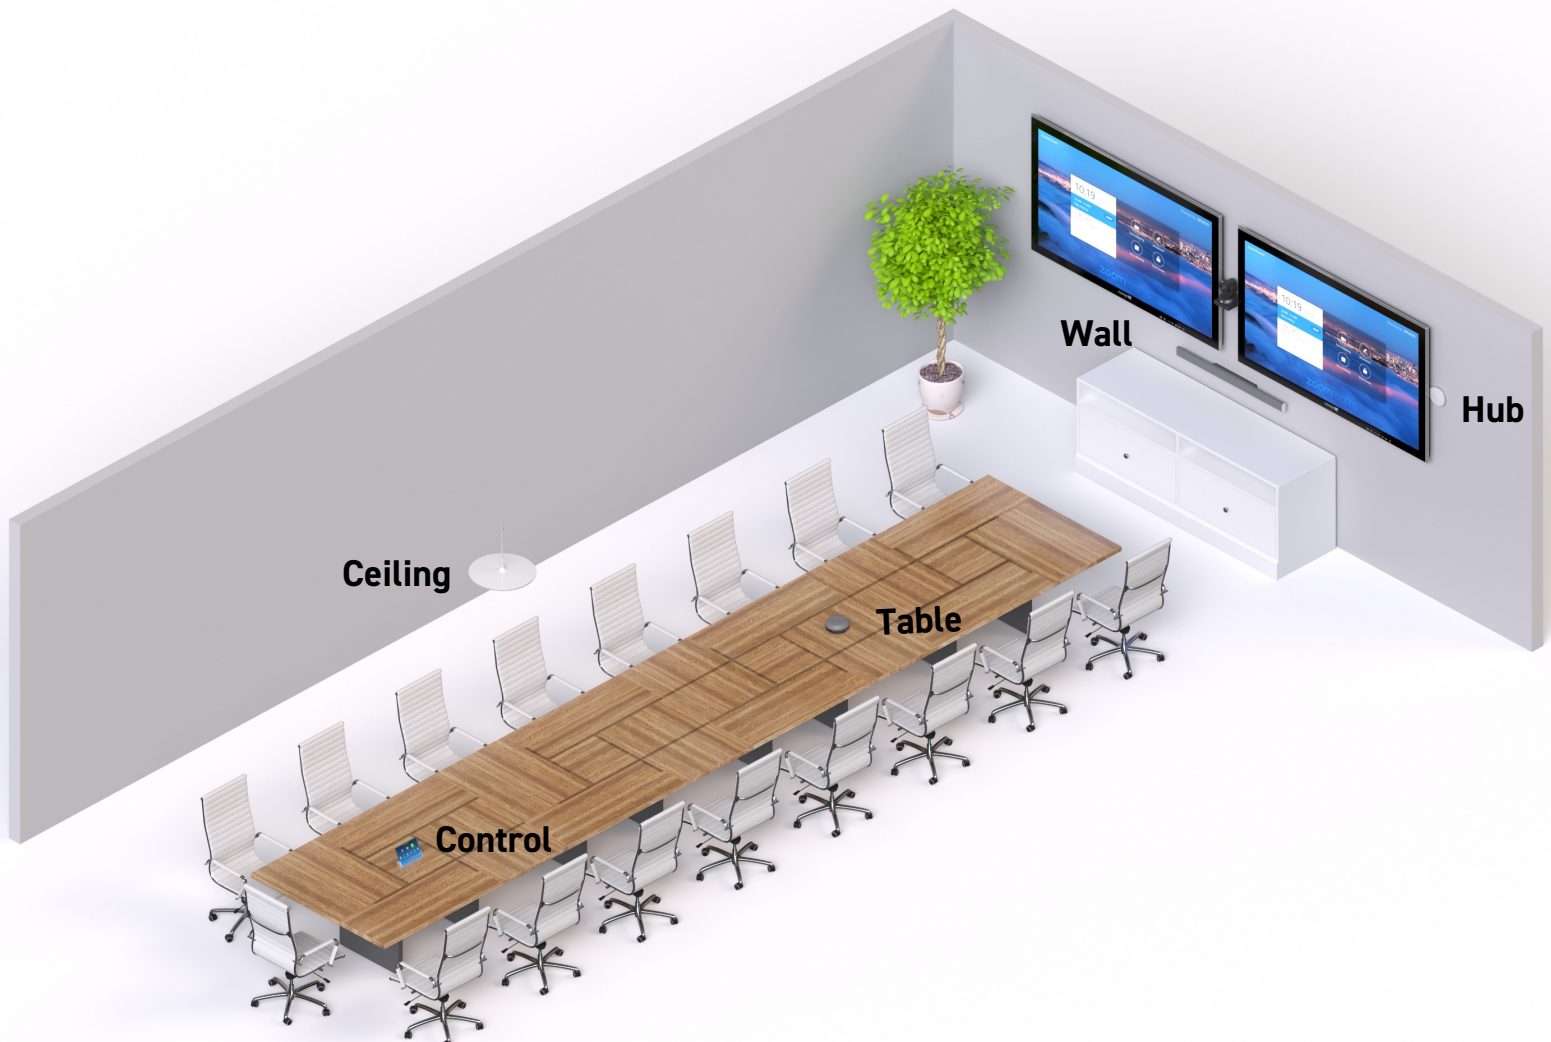

Mix and match all Stem devices for a customized audio solution.

Set up, control, and manage your rooms and devices on your network.

Stem solutions are compatible with your favorite conferencing platforms.

How It All Connects
