MAKE DIFFERENT EASY

SHURE

MXCW MICROFLEX® COMPLETE WIRELESS

The shifting events landscape requires blended technology solutions for virtual, in-person, and mixed formats. Shure's MXCW System offers the flexibility, scalability, and reliability that event organizers need. Make remote or socially distanced participants feel part of the conversation, with high-quality audio that is built to adapt.

➕ WIRELESS THAT JUST WORKS

NO DISRUPTION

Innovative wireless technology automatically selects clean transmission channels and actively avoids interference to ensure your meeting remains uninterrupted.

SIMPLE & QUICK SETUP

With only three core components, even non-technical users can set up the system in minutes. The web interface allows configuration changes with a few clicks.

SECURE YOUR MEETING

Confidential conversations? No problem. AES-128 wireless encryption keeps your meeting content private and gives you peace of mind.

PERSONALIZED EXPERIENCE

Configure the wireless conference units to support different user roles. Display event logo or images, participant names, meeting agenda, or voting subject on the customizable touchscreen.

➕ FOR EVOLVING EVENT NEEDS

SOCIAL DISTANCING

The all-in-one design serves everyone in the meeting with great audio, even on a stretched seating plan. Each participant gets a dedicated microphone, loudspeaker and control right in front of them.

IN-PERSON AND REMOTE ATTENDANCE

Keep on-site and virtual attendees engaged with high-quality audio. Digital and analog connectivity offers flexible integration with live streaming applications, online meeting software, or other downstream equipment.

EFFORTLESSLY RECONFIGURED

Allows maximum flexibility with room layouts and accommodates changes in seating arrangements.

LOW FOOTPRINT & VENUE FRIENDLY

Avoid unsightly cable runs, reduce tripping hazards and the overall impact of temporary AV setups in all types of venues.
EXTRA SPACE BETWEEN ATTENDEES

Expand the seating plan to ensure safe social distance while maintaining consistent sound for each participant.
